GPU and RunPod
Non-Applicability Declaration

Project: RePath

gravity declares the following regarding the current use of GPU resources and RunPod in the RePath project:

1. Current Usage

The project currently involves no work requiring GPU resources. It does not use GPU computing resources and has not used RunPod for project activities.

2. Applicability of Requirements

P52 - Determine whether any work requires a GPU: Not applicable at present. The project currently has no work requiring a GPU, so there is no related GPU usage to report.

P53 - GPU Platform and RunPod Evidence: Not applicable at present. As the project has not used RunPod, no corresponding platform usage evidence is available for submission, including account details, Pod ID or endpoint, GPU type, or runtime.

3. Future Updates

If work requiring GPU resources is introduced, or if the project begins using RunPod, gravity will update this applicability declaration and provide the required supporting evidence.
